

Dr. Agnes Muszynska elected a Fellow in ASME

The Board of Governors of the American Society of Mechanical Engineers (ASME) recently elected Dr. Agnes Muszynska to the grade of Fellow. This is a very prestigious level of membership in ASME, and one that is not given lightly. An ASME member must initiate a proposal to elevate another member to this distinguished level.

Dr. Muszynska is a native of Warsaw, Poland. She received her Masters of Science in Mechanical Engineering degree from the Technical University of Warsaw in 1960, her Ph.D in Technical Sciences in 1966, and the second level Ph.D (Doctor of Sciences, Habilitation) in 1977, both from the Polish Academy of Sciences. She has either authored or coauthored over 200 technical papers on mechanical vibrations and rotating machine dynamics and has received several awards.

Since 1981, she has been Senior Research Scientist at Bently Rotor Dynamics Research Corporation. From 1988 to 1993, Dr. Muszynska served as an Associate Editor of the Transactions of the American Society of Mechanical Engineers' Journal of Vibration and Acoustics. She has organized several ses-

sions on Rotating Machine Dynamics for ASME conferences on gas turbines and vibration and noise and transport phenomena.

The newly-elected Fellows, including Dr. Muszynska, will be recognized in a special insert in *Mechanical Engineering* magazine (the October or November issue). ■
